Higher National School Student want to employee its capacities.

📞 +213-675-5147-30   🌐 iayvob.vercel.app   ✉ a.chalabi@hns-re2sd.dz

value Expected

Web Developer
I can deal with problem as engineer and a professional problem solver , where i can maintain and try to make scalable work on coding and ideas.

Designer
The design and the first impression is one of the point that i can deal with , i love study and analyses the objective to make interactive and useful design.

Data & information
When it comes to data you need a one how know its mission , and the dealing with SQL data is not simple but need a real engineer how can manage all in one

Optimisation
One of the key factors often ignored by the majority of failed businesses is the necessity for future scalability and maintainability.

Languaging
For me i work on this in my childhood where i learned English also french and Deutsch and don't forget my native language is Arabic.

Soft
Managing and planning is my satisfaction that feels me that i am in the right path from time to work path and priorities, Also love team working and developing environments, familiar with AI tools.
